Dear Joshua,

I received recently a letter from a certain Shozo Inoki, written on your advice, and which represents an attempt at informing me of the results of his work on Trypanosoma gambiense, which results apparently are very similar to those I obtained with yeasts. The information conveyed by this letter is as clear to me, as if it had been written in Japanese. Could you find a few minutes off, to let me know what I was supposed to learn from Mr. Shozo Inoki's letter? I am very intrigued!

With kind regards from both of us to both of you,

Sincerely,

Boris EPHRUSSI
